WARNING

TO REDUCE THE RISK OF FIRE OR INJURY TO PERSONS:

- ✔ Please exercise caution when using the lamp, as it tends to HEAT up rapidly. We recommend taking necessary safety measures to ensure optimal usage.
- ✔ For your safety, please refrain from touching the HOT lens, guard, or enclosure. We recommend waiting for the product to cool down before handling it.
- ✔ To prevent any fire hazards, please ensure that the lamp is kept away from materials that may easily catch fire. We appreciate your cooperation in maintaining a safe and secure environment.
- ✔ For safety reasons, we recommend that only a qualified professional install this electrical product.
- ✔ Before attempting to install this unit, ensure all power connections are off for your own safety.

WARRANTY

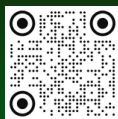

- We stand behind the quality of our product and offer a 2 Year warranty. Kindly ensure that you keep the proof of purchase as it will be required for any warranty claims.
- Warranty will be void if there is any damage due to improper usage or modification to the fixture.
- Failure to comply with the instruction in this manual may increase the risk of damage or injury and will void warranty.

PRODUCT OVERVIEW

Enhance your landscape with the CDPA71 Integrated Mushroom Aluminum Path Light (6-Piece Set), a premium-grade, low-voltage lighting solution designed for both functionality and aesthetic appeal. Crafted from high-quality aluminum, these six path lights deliver superior durability, weather resistance, and long-lasting illumination, making them ideal for residential and commercial outdoor applications. Whether lighting up walkways, garden paths, driveways, or outdoor living spaces, the CDPA71 set provides a soft, evenly diffused glow that enhances safety and ambiance.

KEY FEATURES & BENEFITS

Premium-Quality Construction

- ✓ 6-Piece Path Light Set – Provides comprehensive lighting coverage for larger outdoor areas.
- ✓ High-Grade Aluminum Housing – Corrosion-resistant and built to withstand harsh outdoor conditions.
- ✓ Integrated LED Technology – Ensures energy efficiency, longevity, and consistent brightness without the need for frequent bulb replacements.
- ✓ Elegant Mushroom-Style Design – Blends seamlessly into landscaping while providing wide light coverage.

Superior Illumination & Efficiency

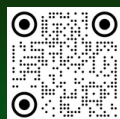

- ✓ Low-Voltage 12V System – Safe, energy-efficient, and perfect for landscape lighting setups.
- ✓ Warm White Illumination – Produces a soft and inviting glow, enhancing the beauty of outdoor spaces.
- ✓ Reduced Energy Consumption – Integrated LED minimizes electricity costs while delivering high-lumen output.

Weatherproof & Built for Outdoor Use

- ✓ IP65-Rated Waterproof Design – Fully sealed against rain, snow, and moisture, ensuring optimal performance in all weather conditions.
- ✓ UV-Resistant Finish – Prevents fading, rust, and deterioration over time.
- ✓ Durable Ground Stakes for Stability – Ensures secure and long-lasting installation in soil, gravel, or mulch.

IDEAL APPLICATIONS

- ✓ Garden Pathways & Walkways – Guides visitors safely with a warm, inviting glow.
- ✓ Driveways & Entryways – Enhances visibility and security while elevating curb appeal.

- ✓ **Outdoor Living Areas** – Perfect for patios, decks, and courtyards, adding **ambiance and charm.**
- ✓ **Commercial & Hospitality Landscaping** – Ideal for hotels, resorts, golf courses, and outdoor event spaces.
- ✓ **Public Parks & Community Spaces** – Creates well-lit, visually appealing environments.

TECHNICAL SPECIFICATIONS

- **Quantity:** 6 Path Lights
- **Material:** Heavy-Duty Aluminum
- **Voltage:** 12V Low Voltage
- **LED Type:** Integrated LED
- **Color Temperature:** Warm White
- **Waterproof Rating:** IP65
- **Installation:** Ground Stake for Secure Mounting
- **Application:** Residential & Commercial Outdoor Spaces

TOOLS & MATERIALS NEEDED

Tools:

- Shovel or trowel
- Wire stripper
- Screwdriver
- Tape measure

IMPORTANT SAFETY INFORMATION

To ensure optimal performance and safety, always use our fixtures ONLY with a low-voltage landscape transformer. This transformer reduces the voltage from 120V to 12V, making it safe and suitable for outdoor use. Failure to follow these guidelines may result in electrical hazards or damage to the fixture.

DO NOT INSTALL WITHIN 10 FEET OF A POOL, SPA OR FOUNTAIN

TOOLS & MATERIALS NEEDED

Tools:

- Shovel or trowel
- Wire stripper
- Screwdriver
- Tape measure

Materials:

- CDPA71 Path Light
- Ground stake (included)
- Electrical connectors
- Low-voltage transformer (for low-voltage systems)
- WN12 Wire nuts (Sold Separately)

STEP-BY-STEP INSTALLATION INSTRUCTIONS

Step 1: Plan Your Layout

- **Determine Placement:** Choose the path or area where the lights will be installed. Measure the distance between lights to ensure even illumination. A typical spacing is 6–10 feet apart, depending on the desired light spread.
- **Consider Power Source:** Ensure that the Spotlight can be connected to a suitable power source. Ensure that the input voltage of the light cable wires is 12V AC/DC. Using improper voltage may cause malfunction or permanent damage to the fixture.

DO NOT INSTALL WITHIN 10 FEET OF A POOL, SPA OR FOUNTAIN

Step 2: Prepare the Ground

- **Dig the Hole:** Using a shovel or trowel, dig a hole where you want to install the Spotlight. The hole should be deep enough to accommodate the ground stake.
- **Ensure Stability:** Make sure the hole is wide enough to allow the ground stake to sit firmly. Test-fit the stake by inserting it into the hole to ensure stability before proceeding.

Step 3: Establish a Secure Electrical Connection

For a dependable and long-lasting electrical connection between the fixture wires and the main line in outdoor or underground installations, follow these guidelines:

- Use a direct burial-rated main cable connector designed to withstand environmental conditions, resist moisture and corrosion, and provide robust insulation.
- We recommend using WN12 waterproof wire nuts (sold separately) for optimal connectivity and protection against the elements.

Step 4: Wire Connection Instructions

Strip the insulation: Carefully strip approximately $\frac{3}{4}$ inch (1.9 cm) of insulation from the ends of the two wires to be connected. Ensure that the exposed metal ends are clean and free of frayed strands.

Align the wires: Hold the stripped ends of both wires together, making sure they are neatly aligned with no stray strands crossing over.

Twist the wire nut: Firmly twist the wire nut clockwise onto the wires until it is tight and secure.

INSTALLATION GUIDE FOR CDPA71

Insert the wires into the wire nut: Push the aligned wire ends all the way into the wire nut, ensuring that the bare metal is fully covered.

Test the connection: Gently tug on each wire to ensure they are firmly held in place and will not come loose.

Inspect the connection: Ensure that no exposed wires or loose strands are visible. If the connection is not secure, remove the wire nut and repeat the process.

⚠ Note: Always follow local electrical codes and regulations when performing electrical work. If unsure or uncomfortable with electrical tasks, consult a qualified electrician. Safety should always be a top priority.

Step 5: Mounting the Fixture

- Insert the spike mount into the ground, ensuring it is vertical and stable for proper positioning.
- Adjust the light angle as needed to achieve the desired illumination.

Step 6: Power On & Final Adjustments

- Turn on the power to test the fixture.
- Make any final angle adjustments to ensure optimal lighting coverage.
- Verify proper operation before completing the installation.

INSTALLATION GUIDE FOR CDPA71

- Bury the main cable underground for safety and protection from external elements.
- Do not exceed the maximum wattage specified for the fixture to prevent overheating or damage.
- Regularly inspect and maintain your lighting system to ensure long-term reliability.

MAINTENANCE TIPS

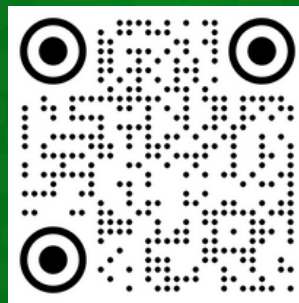

- **Regular Inspection:** Periodically check the fixture to ensure they are still securely mounted and functioning correctly.

SAFETY PRECAUTIONS

- Always wear appropriate safety gear, such as gloves and safety glasses, during installation.
- Ensure the mounting surface is capable of supporting the weight of both the bracket and the lighting fixture.
